

embodied carbon declaration

EC0002-D: 03/23

embodied carbon declaration for vsh xpress

Measuring our carbon emissions is the first step on the path to reducing them. As manufacturers of integrated piping systems, disclosing the embodied carbon of our products is key for achieving credible full life cycle assessments of the systems and buildings we help build.

The embodied carbon of a product includes all emissions released during making, installing and end-of life disposal. This excludes any emissions produced during its use and any benefits of potential reuse, recovery or recycling of materials at the end of its life. In the case of Aalberts IPS products, most emissions originate from the raw materials used to make them. This report does not include embodied carbon of packaging.

The table below shows the embodied carbon of our products calculated using **CIBSE TM65***. The total embodied carbon is reported in **kgCO₂e**: kg of carbon dioxide equivalents. This shows the impact of all greenhouse gas emissions as if they were CO₂ to allow for unified reporting.

While we conduct further investigation into our supply chains, we are choosing to calculate embodied carbon by using industry average values for the percentage of recycled content in our raw materials.

VSH XPress

VSH XPress is a press-fit jointing system, manufactured from copper, stainless steel, and carbon steel in sizes from 15-159mm.

A press-fit tool is used to compress fittings onto tube avoiding the need for solder, adhesives, or additional jointing materials.

It is ideal for use across a broad spectrum of applications and completed joints provide electrical continuity.

copper

XPress copper fittings are manufactured from copper and copper alloy, designed for joining copper tubes to BS EN 1057 in sizes from 15-108mm. They are designed for use in potable water applications, hot and cold water services, and in heating and chilling water applications.

The fittings are guaranteed for 25 years against manufacturing defects, hold full BSI Kitemark Certification and are WRAS and DVGW approved.

VSH XPress copper fittings have a leak before press feature. This ensures any fittings that have been mistakenly left un-pressed are picked up during system testing.

stainless

XPress stainless comprises press-fit fittings and stainless steel 316 system tube, available in sizes 15-108mm, the range is designed for use in potable water applications where water quality and hygiene are crucial.

The fittings are guaranteed for 25 years against manufacturing defects and are WRAS and DVGW approved.

VSH XPress stainless fittings have a leak before press feature. Each fitting is individually marked indicating material (green for stainless). Male ended fittings are also pre-marked with the required insertion depth.

carbon

XPress carbon incorporates fittings and two carbon steel system tube options, available in sizes 15-108mm, with plastic coated galvanised carbon steel system tube in sizes 15-54mm. The range is designed for use in vented and unvented closed circuit heating and chilled water applications.

The fittings are guaranteed for 10 years against manufacturing defects when installed exclusively with carbon steel system tube.

VSH XPress carbon fittings have a leak before press feature. Each fitting is individually marked indicating material (red for carbon). Male ended fittings are also pre-marked with the required insertion depth.

copper gas

XPress copper gas fittings are manufactured from copper and copper alloy, designed for jointing copper tubes to BS EN 1057 in sizes from 15-108mm. They are designed for external above ground 2nd and 3rd family gas installation pipework.

The fittings are guaranteed for 25 years against manufacturing defects, hold full BSI Kitemark Certification, are DVGW approved and meet the requirements of section 5(1) of The Gas Safety (Installation and Use) Regulations 1998.

stainless gas

XPress stainless comprises press-fit fittings and stainless steel 316 system tube, available in sizes 15-108mm, the range is designed for use in potable water applications where water quality and hygiene are crucial.

The fittings are guaranteed for 25 years against manufacturing defects and are WRAS and DVGW approved.

VSH XPress stainless fittings have a leak before press feature. Each fitting is individually marked indicating material (green for stainless). Male ended fittings are also pre-marked with the required insertion depth.

tools and accessories

Joints in the VSH XPress system are made by compressing the fitting onto the tube with an appropriate press-fit tool. These are available in 110V and 240V mains, and cordless to suit most site installations.

A full range of press-fit jaws, slings and adaptors, along with all of the relevant accessories required, are available to ensure that every installation option is covered.

A variety of VSH XPress accessories complement the range, including replacement O-rings, lubricants, tube strippers, a deburring tool, depth gauges and a tube preparation kit.

Coming soon!				

valves

Pegler valves combine with VSH XPress fittings in order to deliver a seamless integrated piping system for press-fit connection.

A wide selection of valves are available including dynamic and static balancing valves, gate valves, ball valves, check valves, strainers, thermal circulation valves and pressure reducing valves.

fullflow

FullFlow ball valves compliment the XPress system. A streamline design that introduces a full bore valve within a streamline fitting. Made of galvanised steel, they are suitable for HVAC applications
