

Orbello Mine Reclamation Works

The Orbello Mine Reclamation Works in Gympie, QLD, required a durable and efficient piping solution for the installation of its main waterline and decant waterline. Given the challenging site conditions and the need for a reliable, flexible, and easy-to-install connection system, the Shurjoint H305 HDPE Coupling was chosen as the preferred solution for its versatility, ease of installation, performance and durability, and cost efficiency.

The implementation of Shurjoint H305 HDPE Coupling for both the main waterline and decant waterline provided a dependable and cost-effective solution. The project was completed on schedule, with the couplings performing as expected under operational conditions, reinforcing their suitability for demanding mine reclamation applications.
